an exploration of the consequences for literature of the suppression of ethical traditions

this book presents a broad and new theory of theory formation in ethics there are many existing theories and more could be generated but most thinkers of theory formation have a narrow view of what a theory of ethics should be like they favor certain kinds of grand theories that generate various ethical rules and principles in fact these grand theories allegedly do so much work that they give the appearance of being super theories or strong theories many theory creators think that it is possible to create strong theories and that they themselves have created such a theory anti theorists scoff at these claims in effect then the argument between the two sides is not one of theory versus anti theory but of grand or strong theory versus anti grand or strong theory nick fotion argues that once a broader view of theory is accepted it is easier to see that there really is no serious conflict between theorists and anti theorists in principle both sides if they overcome their addiction to thinking in terms of grand strong theory formation can accept a role for theories in ethics theories in ethics can be either grand or local in nature provided theory creators and users don t expect theories to perform all kinds of impossible tasks e g to deal with all of our ethical problems and be so fully justified that only one theory can be accepted as being correct it is easier to accept them it is also easier to accept the idea that a theorist might very well appeal to more than one theory to help him or her deal with whatever ethical issues bother

ethics theory and reality offers teachers and students an introduction to ethical principles that dictate human behavior as the title says it is an introduction to the key theories of ethics and their application to reality unlike many books on ethics that were written from the teacher s vantage point this book was both inspired by and written for learners of ethics our ultimate aim is to reply to their questions while introducing them deeper into ethical theories and practice ethics is quite a different course all other courses give information to the students which leads to skills ethics gives not only information and skills on how to deal with different ethical dilemmas but it also gives formation the students of ethics are expected not only to gain ethical skills they are also expected to gain transformation a study of ethics is not just about information it is also about transformation this is because ethics always comes down to our character and the actions that flow from it but because many times behind our actions there are deep rooted theories and beliefs the book tries to present both the theories and the practice of ethics
