music has long been neglected by aestheticians who tend to privilege discussions of visual arts and literature in this volume herbert m schueller brings the aesthetics of music into the fold tracing the development of the idea from classical antiquity through the medieval period he writes in a manner accessible to scholars whose specialties lie outside of technical music theory keeping in mind especially the aesthetician but also general medieval scholars and even the general reader

this introduction to the philosophy of music concentrates on the aesthetics and on the issues that illuminate musical listening understanding and practice

in music an art and a language walter raymond spalding offers a groundbreaking exploration of music as both a profound artistic expression and a complex form of communication spalding s literary style is characterized by meticulous analysis and eloquent prose drawing upon a rich tapestry of musical theory and practice the book deftly situates itself within the broader context of early 20th century thought where the relationship between art and language was increasingly scrutinized spalding invites readers to transcend mere auditory experience urging them to perceive music as a vibrant language that conveys emotions ideas and cultural narratives walter raymond

spalding a distinguished american composer and music educator was deeply influenced by the academic and artistic milieu of his time his extensive background in both music theory and performance coupled with a philosophical inquiry into human expression shaped his conviction that music transcends boundaries and serves as a universal language spalding s insights are not only rooted in his academic pursuits but are also informed by his personal experiences with music as a means of connection and expression throughout his life this eloquent treatise is highly recommended for anyone interested in understanding the intricate relationship between music and language spalding s exploration makes this work invaluable for musicians educators and enthusiasts alike as it challenges readers to listen more deeply and appreciate music as a multifaceted art form that profoundly enhances the human experience

what is music modern society has come to view music largely as entertainment and commodity in response we are music an existential journey toward infinity provides the reader with a holistic starting point music has unlimited potential to transform and enlighten and is only impeded when bound by materialism physicalism and reductionism we are music is an attempt to bring music back to the core of humanity as an agent of positive empowerment self actualization and beyond embracing interconnectivity music is more deeply experienced alongside the arts science social sciences math philosophy history and above all spirituality an endless spiral self perception and identity can be vastly expanded if not questioned and transcended music is an infinite field and any attempt to define and describe it is problematically finite and consequently limited herein lies the impossibility of the book which both excites and disturbs the paradox of being and not being a roadmap for music lovers toward self realization we are music is for those who desire to delve deeper into the power and illusion of self through music

building on her earlier work the power of music a research synthesis of the impact of actively making music on the intellectual social and personal development of children and young people this volume by susan hallam and evangelos himonides is an important new resource in the field of music education practice and psychology a well signposted text with helpful subheadings the power of music an exploration of the evidence gathers and synthesises research in neuroscience psychology and education to develop our understanding of the effects of listening to and actively

making music its chapters address music's relationship with literacy and numeracy transferable skills its impact on social cohesion and personal wellbeing as well as the roles that music plays in our everyday lives considering evidence from large population samples to individual case studies and across age groups the authors also pose important methodological questions to the research community the power of music defends qualitative research against a requirement for randomised control trials that can obscure the diverse and often fraught contexts in which people of all ages and backgrounds are exposed to and engage with music this magnificent and comprehensive volume allows the evidence about the power of music to speak for itself thus providing an essential directory for those researching music education and its social personal and cognitive impact across human ages and experiences
